Competences

- Project Management
- Medical Device product development from idea and business case to volume production
- Management of R&D projects and R&D teams
- Concept and idea generation
- Medical Diagnostic Equipment, IVD
- Drug-Device combination products
- ISO13485 and GxP,
- Expert level in
 - Liquid handling devices
 - Devices based on an optical measurement
 - Diagnostic consumables
 - Microfluidics
 - Hydrophilic coatings
 - Materials and manufacturing processes
 - Low cost and high-volume production
 - Stability trials

Educational background and Experience

- M.Sc. Micro Systems Engineering
- Ph.D. degree in Micro- and Nanotechnology
- CBA, Certificate in Business Administration
- Assistant research professor
- Sensor and microtechnology
- Point-of-care technology
- Market and technology evaluations
- Data analysis and trouble shooting
- Combination Device and Drug Delivery
- Medical Diagnostic Equipment, IVD

References

MEDICOLOGIC A/S 2016 - present

Senior R/D Project Manager

Joninn ApS

Manager and Senior Consultant

Founded the company in 2010 with a focus on Medical Device consultancy and contract R&D.

Assisted mainly American companies in product development. 7 of these products are currently on the market.

Over time the company moved into development and production of hydrophilic coatings.

Scandinavian Micro Biodevices ApS (SMB)

Chief Technical Officer (CTO)

Co-founded the company in 2000, and leader of the 18 people product development team. Key driver in establishing and growing the company's medical device technology base and the R&D team. Managed the development and transfer to production of the company's first 5 medical device products: the QuickVet and VSpro blood analyzers and the associated test consumables.

SMB was acquired by American Zoetis Inc. in 2016 for 80 million USD.

Key Results

- Founder of two successful Medical Device companies.
- Contributed to the development of 24 products currently on the market.
- Inventor of 17 patents related to Medical Device technologies.
- Successfully transferred 10+ products into volume production

Personal Characteristics

Jacques is pragmatic, focused, results- driven and always eager to solve current problems so the project and team can proceed.

Innovative and out-of-the-box thinking.

Jacques spends his free time with family, sports are running and bodyflying.
